PRE- SURGICAL INSTRUCTIONS - Before your pet has surgery, please follow these instructions carefully:

1. Your pet should not have ANY food or treats **after midnight** on the night before surgery.
However, pets should **always** have access to water.

2. Please be on time for check-in at the designated location:

DOG Drop-off is at **8:30am**; **CAT** Drop-off is at **9:00 am**.

All dogs must be on a leash (make sure the collar is snug), and all cats must be in a carrier (the carrier needs to be **clean** with newspaper or towel inside). Separate carriers are recommended for multiple cats.

Please label the carrier with the cat's name and your last name. Feral (wild) cats **must** be in a humane trap.

3. If your pet is current on vaccines, you must bring written proof from your veterinarian. Otherwise, we are required by law to re-vaccinate. Rabies tags are not adequate for proof. We will not be able to call your veterinarian for this information.

4. When you drop off your pet, we will notify you of the pick-up time. This will vary depending on the number of appointments that day.

5. If you can't keep your scheduled appointment, please give at least 48 hours notice so that your slot can be given to another animal on the waiting list.
